

CASE STUDY

INTEGRATED FIRE PROTECTION IN THE FOOD INDUSTRY

AMFE PROTECTS PRODUCTION OF OeTTINGER BEER BREWERY GERMANY

The Original OeTTINGER brand is considered one of the largest beer brands in Germany. The OeTTINGER Brauerei GmbH is one of the top 25 breweries in the world and has been honored for its high performance and first-class product quality since 1980 and received more than 300 national and international awards.

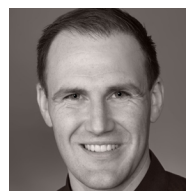

Especially in the food industry, high safety standards apply, also regarding fire protection. VdS Schadenverhütung has developed a special protection concept especially for breweries. The OeTTINGER brewery in Brunswick has now equipped its machines with the mini fire extinguishing unit AMFE to reduce the risk of fire and business interruptions.

The extinguishing agent FK-5-1-12 contained in the AMFEs has a seven times higher extinguishing capacity than CO₂, extinguishes without leaving residues and is harmless to humans, making it ideal for use in the food industry.

AMFEs can reduce the risk of operational or production downtime as a result of a fire.

”

In the event of a fire, the AMFE is **thermally** triggered or activated by sensors **before** the fire can spread.

Alexander Schneider, Sales Manager,
Meister Automation GmbH

The AMFE mounted on top of an
electrical cabinet

Country: Germany
AMFE partner: Meister Automation GmbH
End customer: OeTTINGER Brauerei GmbH
Segment: Food industry
Solution: R-AMFE with gauge and Multialert®

For questions about application possibilities or technical details about the mini fire extinguisher AMFE please contact Markus Fiebig (markus.fiebig@job-group.com).

VdS certified AMFE with
gauge for easy maintenance
